Isn't it obvious what's going on? They aren't trying to monopolize, they are conquering the world. While this anti trust suit goes to shambles, its a distraction as the big 'M' buys up other companies to gain world domination in the computer industry. I cant believe my tax dollars actually pay some of your salaries. Look at the headaches from the at@t break up, the dereg of CATV etc. Is it really creating competition? Didn't you read the article about a \$250 a month cable TV bill from aol? Penalize the company...they should be forced to refund every registered windows product to its owner in full. Did you know that not only Microsoft Csr really sucks, the phone call is paid for by the consumer, and they keep you on hold for an hour before they say hello.
